Introduction

This is the Solvency and Financial Condition Report (SFCR) for Berkshire Hathaway International Insurance Limited ("BHIIL" or "the Company" or "the insurer"), based on the financial position as at 31 December 2023.

This report sets out aspects of the Company's business performance, system of governance, risk profile, valuation methods used for solvency purposes and its capital management practices, as described by the Solvency II Regulatory Framework.

Summary

The Company uses the Standard Formula to calculate its solvency capital requirement. The Standard Formula produces a Solvency Capital Requirement which management accept as appropriate to use for the business under Solvency II standards. The Company has not placed any reliance on transitional measures to the Solvency II Directive 2009/138/EC.

The key solvency ratios are disclosed below. The calculations of the capital requirements are defined by the Solvency II Regulations.

Key Capital Performance Indicators

	2023	2022
	\$000	\$000
Available and Eligible Own Funds	653,796	593,926
Standard Formula Solvency Capital Requirement (SCR)	138,280	151,176
Surplus over SCR	515,516	442,750
Ratio of Eligible Funds to SCR	473%	393%
Minimum Capital Requirement (MCR)	39,075	37,794
Surplus over MCR	614,721	556,132
Ratio of Eligible Funds to MCR	1673%	1571%

As at 31 December 2023 BHIIL had a Standard Formula Solvency Capital Requirement of \$138m. This is covered by \$654m of eligible capital resources resulting in a Solvency II surplus of \$516m and a coverage ratio of 473%.

The SCR decreased by \$12.9m during the year. See Section E2 for details of key drivers of the decrease.

It is forecast that the Company will continue to maintain a surplus over both the Standard Formula Solvency Capital Requirement and the Standard Formula Minimum Capital Requirement over the current planning horizon. There are no current indicators that suggest that this is likely to change over the longer term.

A. Business and Performance

A.1 Business

Berkshire Hathaway International Insurance Limited ("BHIL") commenced trading on 1 January 1997 and its principal activity is underwriting general insurance business. The Company's operations are administered by the Company with additional administrative and claims handling services being provided by related group companies. The Company's operations are directed from London and Manchester but it also operates from branch offices in Switzerland, Italy and Germany, which is in run-off.

BHILL is a wholly owned subsidiary of National Indemnity Company (NICO), an insurance company and a subsidiary of Berkshire Hathaway Inc. (BHI), a multinational conglomerate holding company quoted on the New York Stock Exchange. Both NICO and BHI are headquartered in Omaha, Nebraska.

At 31 December 2023 NICO had a \$226bn Surplus as regards policyholders and total assets of \$381bn. BHIIL is one of a number of subsidiaries of NICO. BHIIL represents less than 1% of the total assets of NICO, and less than 1% of NICO's reported consolidated underwriting premium in 2023.

Regulation

BHILL is regulated by the Prudential Regulation Authority (PRA) and the Financial Conduct Authority (FCA). The Swiss Branch is regulated by the Swiss Financial Market Supervisory Authority (FINMA) and the Italian Branch is regulated by the Italian Institute for Insurance Supervision (IVASS).

Contact details for each of these regulators can be found on their respective websites:

www.bankofengland.co.uk/pra

www.fca.org.uk

www.finma.ch

IVASS - Istituto per la vigilanza sulle assicurazioni

The external auditor for the Company for the year ended 31 December 2023 is Deloitte LLP.

The registered office of BHIIL and principal place of business and the contact details of its external auditors and supervisory authority are presented below:

Registered Office	External Auditors	Supervisory Authority
Berkshire Hathaway International Insurance Limited	Deloitte LLP	Prudential Regulation Authority (PRA)

London EC3M 4AJ	EC4A 3BZ	EC2R 6DA
+44 (0) 20 7342 2000	+44 (0) 20 7936 3000	+44 (0) 20 7601 4444

Strategy

The business strategy is to manage the underwriting cycle and write selected classes of business over the long-term to achieve an underwriting profit over the course of the cycle. The underwriting business is managed in divisions, the risk appetite and business strategy being defined at company level.

Berkshire Hathaway Specialty Insurance (BHSI) Division: This division writes Casualty, Property, Executive & Professional, Punitive Damages, Marine and Healthcare lines under the BHSI brand. The BHSI operation within BHIIL was formed in 2016 and targets appropriate commercial insurance using the financial strength of Berkshire Hathaway to provide the ability for outsize capacity and creative, flexible solutions customers can count on year after year. A core element in this is building the capability for claims excellence, a key element of the BHSI brand.

Berkshire Reinsurance Group ('BHRG') Division: This division maintained its UK Commercial motor business in the year through two strategic Managing General Agency (MGA) agreements and its Italian Medical Malpractice coverages for hospitals and clinics through in-house underwriting teams based in the Company's Italian Branch. In addition this division is, on occasion, approached by Brokers to underwrite large one-off risks, which are considered on their individual merits.

The BHRG division continued to write small amounts of high level US Casualty business.

The BHRG Division also has a long standing participation on the Global Aerospace Underwriting Managers (GAUM) aviation pools. The GAUM participation allows the Company to write general insurance policies for Airline, Products, General Aviation and Space insurance to the aviation and space industries.

The BHRG division continued the orderly run-off of its Broker facility, legacy motor accounts and reinsurance treaty business.

<u>MedPro Division</u>: This division works closely with a US sister company, MedPro Group, to continue to develop business opportunities for the provision of medical malpractice and associated coverage for the full spectrum of healthcare customers. This division provides cover for healthcare practitioners, hospitals and other healthcare institutions.

<u>Faraday Division</u>: Faraday, a member of the Group of companies, manages a Lloyd's Syndicate in the UK as well as an FCA authorised intermediary, which placed business with the Company. No further business is being written by this division and the claims are in run-off.

The Company has a comprehensive outwards reinsurance program placed with companies within the Berkshire Hathaway Group, with the most material cover provided by NICO and Berkshire Hathaway Homestate Insurance Company (BHHIC).

Surplus capital is maintained in order to take up business opportunities as they arise and additional capital can be made available by NICO if required to support attractive new underwriting or for other reasons. BHIIL's current policy is to retain excess capital in order to enable some flexibility on the current year business plan. BHIL and NICO are both rated AA+ by Standard & Poor's.

For funds supporting underwriting, the investment strategy is conservative and investment guidelines require funds to be invested in fixed interest securities with a credit rating of A and above, held to maturity.

The Capital Surplus Portfolio comprises equity investments and countenances potential market volatility and lower asset liquidity as well as accepting potential concentration risk.

The Company has in place Trust Fund Agreements with NICO and BHHIC in respect of the exposure generated from the outwards reinsurance program. This arrangement satisfies the requirement of the Company to manage its exposure to NICO and BHHIC, under the current regulatory regime.

All other risks are actively managed to mitigate the possibility of significant adverse impact to the business.

Underwriting, investment, and other matters may be subject to consultation with the Parent company and its representatives; however the Board operate in accordance with the interests of BHIL recognising its distinct legal entity status and regulatory requirements.

Brexit Impact

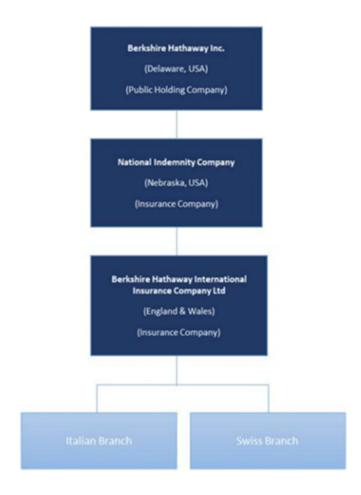

Following the UK's exit from the European Union (Brexit) and the end of the transition period at the end of 2020, BHIIL has now ceased to have EU passporting rights. BHIIL continues to handle and pay claims arising under policies it underwrote prior to Brexit and which relate to exposures in the EEA. However, should this no longer be possible, Berkshire Hathaway European Insurance DAC ("BHEI") has issued a Contingency Deed Poll Policy in favour of all of BHIIL's policyholders which guarantees performance of BHIIL's policies in the event that BHIIL is unable to service those policies due to local restrictions in any EEA State following Brexit. The contingency policy has not been triggered to date.

It continues to be the view of the Directors that the UK and London Market will remain a significant insurance and reinsurance market for the foreseeable future. In 2020 the Company noted that many risks presented in London continued to co-mingle European, UK and rest of the world risks. In response to this BHEI established a UK Branch in London which had the necessary regulatory approvals to service these risks. With the ending of the Transition phase of Brexit the Company is seeing significant amounts of business that would have been written by the Company being more appropriately served by the UK Branch of BHEI based in London. Though a reduction of business volumes for the Company, this will have a limited impact on the UK based operations as resources and costs are re-distributed to the BHEI UK Branch.

The Directors consider the current investment policy and matching of liabilities and assets in currency to put the Company on a sound basis to deal with any market volatility.

Group Structure

Below is a simplified group structure for Berkshire Hathaway Inc. Insurance group pertaining to BHIIL.

Review of the Business

The credit rating from Standard & Poor's for BHIIL remained at AA+ throughout the year (2022:AA+). The full S&P ratings report can be found on the BHIIL website www.bhiil.com.

During the year the Company operated under the four distinct divisions to allow the development of multiple brand offerings.

BHSI Division

The division has continued to extend its product offering through the year as planned. BHSI underwrote a wide array of products across the Casualty, Property, Executive & Professional, Punitive Damages, Marine and Healthcare lines.

BHRG Division

This division maintained its UK Commercial motor business in the year through two strategic Managing General Agency agreements and its Italian Medical Malpractice coverages for hospitals and clinics through inhouse underwriting teams based in the Italian Branch.

In addition BHRG division is, on occasion, approached by Brokers to underwrite large one-off risks which are considered on their individual merits.

The division continued to write small amounts of high level US Casualty business.

The BHRG Division also has a long standing participation on the Global Aerospace Underwriting Managers ('GAUM') aviation pools. The GAUM participation allows the Company to write general insurance policies for Airline, Products, General Aviation and Space insurance to the aviation and space industries.

The division continued the orderly run-off of its Broker facility, reinsurance treaty and legacy motor accounts.

Medpro Division

This division currently has two MGA arrangements in place operating in the UK, and Switzerland. The UK MGA was purchased by a Group Company in January 2018. The MedPro division also writes international risks placed in the London Market.

Faraday Division

No further business is written by this division and the claims are in run-off.

A.2 Underwriting Performance

The Company primarily manages its business by division as described on Section A1. Under Solvency II, the lines of business are pre-defined.

The tables below provide details of the Company's underwriting performance for 2023 and 2022 for the major Solvency II lines of business. Full details of the Company's premiums, claims and expenses for the year are disclosed in template S.05.01.02 which is included within the appendices.

Year ended 31 Dec 2023 \$000	Income Protection	Motor Vehicle	Marine, Aviation &	Fire & Other Damage to	General Liability	Total
		Liability	Transport	Property		
Net Premium Written	107	2,880	6,846	23,387	47,674	80,894
Net Premium Earned	2,222	7,897	6,984	23,029	44,499	84,631
Claims incurred	(2,785)	(2,511)	(2,078)	(14,740)	(20,456)	(42,570)
Changes in other technical provisions	202	719	(145)	601	(1,393)	(16)
Expenses incurred	(208)	(2,459)	(1,917)	(4,278)	(9,839)	(18,701)
Underwriting performance	(569)	3,646	2,844	4,612	12,811	23,344

Year ended 31 Dec 2022	Income	Motor	Marine,	Fire & Other	General	Total
\$000	Protection	Vehicle	Aviation &	Damage to	Liability	
		Liability	Transport	Property		
Net Premium Written	4,197	10,354	6,900	20,107	42,844	84,402
Net Premium Earned	6,115	15,235	6,396	17,739	38,752	84,237
Claims incurred	(6,489)	(11,484)	(3,900)	(5,683)	(16,653)	(44,209)
Changes in other technical	(192)	269	-	(1,292)	(1,047)	(2,262)
provisions						
Expenses incurred	(649)	(3,722)	(1,118)	(3,184)	(9,121)	(17,794)
Underwriting performance	(1,215)	298	1,378	7,580	11,931	19,972

The Board of Directors are satisfied with the underwriting performance of the Company for 2023.

A.3 Investment Performance

The Company considers the assets of the Company to comprise two portfolios. The first portfolio, the Insurance Portfolio, is in excess of policyholder liabilities after reinsurance plus an amount of surplus capital. The second portfolio, the Capital Surplus Portfolio, comprises equity holdings invested outside of the Insurance Portfolio.

In respect of the Insurance Portfolio the Company adopts an investment and risk management policy to ensure that there is no material exposure to market or liquidity risks.

In respect of the Capital Surplus Portfolio the Company accepts market and liquidity risks. The Capital Surplus Portfolio was valued at \$65.1m at 31 December 2023.

The Company has no exposure to derivatives or currency-hedging risks.

The Company's investment return including exchange gains and losses in the year was \$45.4m. Over the year the return on investments improved, comprising an unrealised gain in the year of \$17.0m, realised gains of \$11.4m, Investment income of \$7.5m, bank interest of \$6.6m and foreign exchange gains of \$2.9m.

The Directors consider the current investment policy and matching of liabilities and assets in currency to put the Company on a sound basis to deal with any market volatility.

A.4 Performance from Other Activities

The Company did not undertake any other activities in the year.

A.5 Any Other Information

Since the Russian invasion of Ukraine on 24 February 2022 the Company has been assessing its exposure to insurance losses as a result of the conflict. The Company continues to monitor the sanctions regimes of the US, the EU and the UK to ensure that processes and controls ensure compliance.

The Company provides very limited war coverage but is potentially exposed to secondary effects through the policies it writes. The main areas of focus have been the aviation, marine, directors and officers and cyber portfolios. Management's current assessment is the Company's exposure, net of reinsurance, and the changes in the sanctions regime are manageable and do not significantly impact the Company's ability to continue as a going concern.

In respect of the enhanced risk of cyber-attacks on the Company's IT infrastructure the Company continues to take advice from an external cyber risk monitoring supplier to ensure there is effective threat monitoring and practices and processes to manage this risk.

Since 2022, the Bank of England has raised interest rates to tackle persistent inflationary pressures. Inflation remains higher than in recent years across Europe. There is currently a varied approach taken to address inflation depending on division and class of business and it is expected that some classes of business such as property will experience the impact of inflation more acutely.

B. System of Governance

B.1 General information on the system of governance

The Governance structure of the Company is set out in the BHIIL Governance Map. There have been no material changes to the Governance structure during the year.

Board

BHIIL is run by a Board of Directors operating under documented terms of reference and matters reserved for the Board. The Board oversees various Board Committees who operate under their own Board-approved Terms of Reference and report into the Board on a regular basis. Board meetings are normally held on a quarterly basis with additional meetings scheduled as required.

The board members as at 31 December 2023 were:

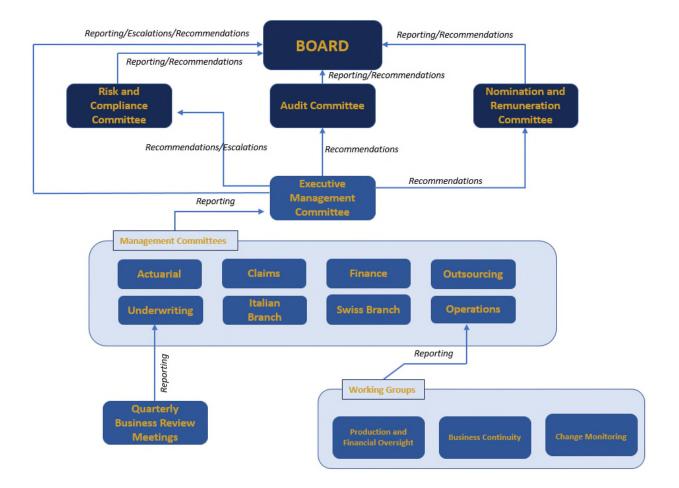

Name	Role and SIMF/SIF Status	Appointment to Role	Other Information
John Powell	Chair of Governing Body	July 2014	
	(SMF9) and Chair of	33.7 232 .	
	Remuneration		
	Committee (SMF12)		
	` '		
	(incorporates		
	Nominations)		
Barbara Merry	Chair of the Risk	September 2021	Member of Audit
	Committee (SMF10) and		Committee
	SMF14 Senior		
	Independent Director		
Andrea Reynolds	Chair of Audit	November 2022	
	Committee (SMF11)		
Nazareno Cerni	Italian Branch Manager	July 2023	
David Fields	Non-Executive Director	December 2023	
	(Notified NED)		
Stephen Michael	Non-Executive Director	January 2019	Member of Audit
	(Notified NED)		Committee
Guy Finney	Chief Executive Officer	January 2023	
	(SMF1) & Responsible		
	for Insurance		
	Distribution		
Robert Love	Chief Underwriting	December 2008	
	Officer (BHRG Division		
	Business) (SMF23)		

The Key Responsibilities of the Board are:

- To determine the strategic direction of BHIIL and to define the Company's Risk Appetite.
- To determine the approach to the Own Risk and Solvency Assessment, challenging and improving the results.
- To ensure that there is a suitably resourced system of Compliance and independent review and to monitor the adequacy of the operation.
- To ensure that customers are treated fairly and that adequate systems to address the risk of Financial Crime are in place.
- To ensure that the Company is compliant with all relevant legislation.
- To ensure that System of Governance remains appropriate.

Committee Structure

The chart below sets out the Committee Structure of BHIIL:

Remuneration

The Company's Remuneration Policy is set by the Remuneration Committee and approved by the Board; it is reviewed on at least an annual basis. The Company's remuneration policies have been designed to ensure that remuneration of its employees, officers and directors are competitive and do not promote excessive risk taking. This aim is achieved through a balance between fixed and variable remuneration, which varies depending on an individual's role, experience, performance since the last review and seniority.

The Company provides a range of benefits to employees, complying with (and where appropriate exceeding) minimum local statutory requirements, including salary, paid leave, discretionary bonus, life cover, permanent disability income protection insurance, health insurance for employees and dependents, and an employee assistance programme. The Company pays pension contributions based on a percentage of salary into a personal pension plan on behalf of its employees. The Company does not offer any supplementary pension or early retirement scheme. The Company does not offer share options.

The Company operates an annual discretionary bonus plan for employees based on individual performance, which is aligned with BHIIL's practices and in compliance with the Company's Remuneration Policy. As well as performance of the individual's responsibilities, the manner in which they do it is important, namely aligning with the Company's core values. Bonuses, targets or incentives are not related exclusively to top line performance, revenue, premium growth or other metrics that might encourage undue risk taking. Thus, its remuneration practices are considered to promote sound and effective risk management and do not promote or encourage excessive risk taking.

Regarding the remuneration of its INEDs, the Company's policy is that, in keeping with their duty of independence, they shall be remunerated by a fixed fee only, and no incentive-based payments will be made. It is the Company's policy that NEDs who are employees of the Group shall receive no remuneration for their duties as directors of the Company.

Material Transactions

There were no transactions with directors or others with significant influence in the period.

Any material intragroup transactions of the Company with other Berkshire Hathaway Group entities during the reporting period were conducted on an arm's length basis. These transactions primarily relate to reinsurance business ceded by the Company to NICO and to payments for key management, underwriting, claims and administrative services provided by other Group companies.

B.2 Fit and Proper Requirements

The Company has a policy which sets out the procedures to ensure that all those who are directors, key function holders or are undertaking controlled functions on behalf of the Company are and remain fit and proper to carry out those functions.

These procedures ensure that all those holding such functions:

- meet the requirements of the Regulators' 'fit and proper' test and follow its principles
- comply with the Statement of Responsibilities; and
- report anything that could affect their ongoing suitability.

The following factors are taken into account when deciding whether an individual is fit and proper:

- their honesty, integrity and reputation
- their competence and capability; and
- their financial soundness.

Fitness and propriety checks are made before an individual is appointed to the Board or to carry out a controlled function or a key function and also periodically thereafter.

B.3 Risk management system including the own risk and solvency assessment

The Board has approved a documented Risk Management Framework.

The Risk Management Framework is designed to ensure that there are clear responsibilities and reporting lines. In conjunction with an appropriate monitoring and reporting structure the Risk Management Framework is intended to provide the Board with confidence that risks are appropriately controlled in accordance with the Board's risk tolerance.

A pre-requisite of managing risk is that the Board have a good understanding of the risks that are faced by the business, and have considered the appropriate level of risk that the business will stand. Articulation of the Board's Risk Appetite in documented Risk Appetite Statements enables cascading of Risk Management throughout the organisation and provides useful reference material when considering new opportunities or process change.

Policy & Procedure for Articulating Risk Appetite

The Risk Appetite Statement describes the Board's appetite for risk.

The risk appetite framework enables the Company to define what strategic objectives are supported in its risk-taking activities and to keep exposure within agreed limits. The Company risk appetite framework therefore supports decision-making processes and understanding of its performance. The Company risk appetite statements are supported by risk appetite metrics, which define the extent of exposure the Company is prepared to tolerate to different types of risk in order to meet its strategic objectives. The risk appetite metrics are updated on a quarterly basis and are presented to the Risk Committee for review.

Operational Risks are managed by the application of internal controls and are also monitored via operational risk appetites. It is the responsibility of the operational management to ensure that appropriate controls are in place to operate within risk appetite.

The relevant risk owners and the Operations Committee monitor the performance of internal controls on behalf of the Risk Committee and the Board. The controls are assessed with regard to their design relative to the Operational Risk considered and the control performance.

Own Risk and Solvency Assessment (ORSA)

The ORSA is an integral part of the Company's business strategy and supports the strategic decision making process. The ORSA framework is a series of processes to enable the Company to manage its risk profile against risk appetite and to ensure that there is an appropriate quantity and quality of capital given the risks facing the business.

The ORSA encompasses the procedures employed to identify, assess, monitor, manage and report the risks each entity may face over the business planning period. The management information that is an output of the ORSA then facilitates informed strategic decisions with consideration to the Company's appetite for risk and the amount of capital needed.

ORSA processes evolve each year to ensure they remain appropriate to the nature, scale and operation of the business. The framework has been designed to be flexible and with a non-prescriptive approach. The ORSA report provides a conclusion of the adequacy of the control framework and capital required given the current and planned risk exposures.

The ORSA process is owned by the Chief Risk Officer and approved by the Board. The Board is responsible for both steering the on-going development of the ORSA process and challenging the results.

The ORSA process combines all elements of the risk and capital framework and is structured to complement the strategy development and business planning processes, to ensure it supports decision making. Outputs from the ORSA process are considered when setting business plans and the risk appetites.

A key concept of the ORSA is that it is a forward-looking assessment and therefore the ORSA process runs in parallel with the business planning and reporting cycle.

A full ORSA process is run at least annually and the Board considers and approves an annual BHIIL ORSA report.

The Company's risk profile will change over the course of the planning period for a number of reasons, such as a significant insurance event, extreme economic conditions, or merger and acquisition. As a result, a full or partial ORSA exercise may be conducted outside of the usual cycle if any change is significant enough that the prior ORSA analysis is no longer relevant and useful.

The main output from the ORSA process is the ORSA report that is provided to the Board for approval. The full ORSA report that goes to the Board is also sent to the relevant supervisory authority.

B.4 Internal Control System

Internal controls are implemented to control risk. All internal controls are efficiently designed to achieve the required level of control in a cost–effective manner. It is the responsibility of the operational management to ensure that appropriate controls are in place to operate within risk appetite. Internal controls are identified with a defined owner responsible for maintenance of the control.

Internal control documentation includes:

- description of the control
- control owner
- risks mitigated by control, and control importance relative to risks (key control)

Internal control performance is recorded in the Risk Management and Internal Control System. There is a quarterly management report to the risk committee reporting control performance.

Compliance Function

The Compliance Function monitors the business to ensure that it is in compliance with all laws and the regulatory framework applicable to the Company. The Compliance Function also provides advice to the Board and the business on all regulatory requirements and monitors compliance with such including licensing and other arrangements, the fair treatment of customers, managing the risk of financial crime including applicable sanctions compliance, product governance, the oversight of outsourced arrangements with third parties and regulatory reporting.

B.5 Internal Audit Function

The function of Internal Audit is to provide independent, objective assurance and is designed to add value and improve the operations of the Company. Internal Audit aims to help Management accomplish their objectives by bringing a systematic, disciplined approach to evaluating and improving the effectiveness of risk management, control and governance processes.

Internal Audit has unrestricted access to all activities undertaken in the organisation, in order to review, appraise and report on:

- The adequacy and effectiveness of the systems of financial, operational and management control and their operation in practice in relation to the business risks to be addressed;
- The extent of compliance with, relevance of, and financial effect of, policies, standards, plans and procedures established by the Board and the extent of compliance with external laws and regulations, including reporting requirements of regulatory bodies;
- The extent to which adequate business continuity plans exist;
- The suitability, accuracy, reliability and integrity of financial and other management information and the means used to identify measure, classify and report such information;
- The integrity of processes and systems, including those under development, to ensure that controls offer adequate protection against error, fraud and loss of all kinds; and that the process aligns with the organisation's strategic goals;
- The suitability of the organisation of the units audited for carrying out their functions, and to report where services are provided in a way which is economical, efficient and effective;
- The recommendation of the follow-up action required to be taken to remedy weaknesses identified by Internal Audit review including monitoring completion against the required resolution date, and, ensuring that good practice is identified and communicated widely.
- The operation of the organisation's corporate governance arrangements.
- The preparation of an annual audit plan and submission of the plan for review and approval to the Audit Committee.
- Carrying out the approved audit plan and reporting to the Audit committee.
- Reporting to the Audit Committee at least annually on:
 - assessments of the adequacy and effectiveness of the organisation's systems of risk management and internal control based on the work of Internal Audit
 - reporting significant issues related to the processes for controlling BHIL's activities, including
 potential improvements to those processes, and provide information concerning such issues
 through to resolution; and
 - providing periodic information on the status and results of the annual audit plan and the sufficiency of Internal Audit resources.

B.6 Actuarial Function

The Chief Actuary is responsible for monitoring various capital adequacy measures to enable the Board to exercise the appropriate level of governance and control of the Company's insurance risk exposures.

The Chief Actuary engages with the Board, senior managers, regulators, reinsurers, and auditors to ensure that the capital position of the Company and the risks that the Company faces are well understood and reflected in the analysis performed as part of the reserving and capital modelling processes.

Principal responsibilities of the Actuarial Function are:

- To engage with the Board, senior managers, regulators and auditors to ensure that the capital position of the Company and that the risks it faces are well understood and reflected in the analysis. Performed as part of the reserving and capital modelling processes.
- To advise the Board on the appropriate level of capital requirements and reserves.
- To keep the Company updated with significant capital and reserving related developments throughout the year.
- To provide proactive support to Underwriting, Claims, Reinsurance, and Investment functions.
- To assist with the production of and to ensure the integrity of the Company's financial information and regulatory reporting.
- Annually the Chief Actuary formally reports to the Board through the 'Actuarial Function Report'
 which documents the tasks, as mandated under the Solvency II directive, that have been undertaken
 by the actuarial function, identifying any deficiencies and giving recommendations as to how such
 deficiencies should be remedied. The report covers the Actuarial Function's calculation of technical
 provisions, opinion on underwriting policy, opinion on the adequacy of reinsurance arrangements,
 and contribution to risk management.

B.7 Outsourcing

Outsourcing is an arrangement where an outsource provider is appointed to perform particular activities which would otherwise be undertaken by staff directly employed by the Company. Entering into an outsource arrangement does not relieve the Company of its responsibility for the outsourced activity. Any substantial activity carried out by an Outsource Provider is subject to the requirements of the Outsource Policy.

The Outsource Policy ensures that:

- An appropriate legal contract exists in respect of the Outsourced activity such that the desired level of control may be exercised.
- The risks surrounding the Outsourced activity are articulated and appropriate controls and/or alternative measures exist so that the Outsourced activity operates within the Board's risk appetite.
- There is a clear allocation of responsibility in respect of Outsourced arrangements.
- There is regular review of the Outsourced activity and risk assessment to ensure any performance issues or changes to the risk profile are considered, and any resulting agreed actions implemented.

Material outsourced arrangements are required to be disclosed to the Regulator. A material outsourcing contract is defined by the PRA as one which is of such importance that weakness, or failure, of the services would cast serious doubt upon the firm's continuing satisfaction of the PRA's threshold conditions or Principles.

As at 31 December 2023, the following key outsourced functions are considered critical and important in line with the terms of 7.2 of Conditions Governing Business in the PRA Rulebook for Solvency II Firms:

- Resolute Management Limited (RML) and Resolute Management Services Limited (RMSL) (both group companies) provide to the Company the Services of certain designated employees as agreed between the Parties from time to time.
- Xceedance Limited, a 3rd party provider, provides back office support to the Company for the BHSI business and some auxiliary activities.

RML and RMSL are both located in the United Kingdom. Xceedance is located in Poland and India.

C. Risk Profile

The BHIIL risk universe comprises six main categories of risk: insurance, credit, market, liquidity, operational and strategic.

Analysis of Risk Profile (As per S.25.01)	2023	2022
	\$000	\$000
Underwriting Risk	88,310	89,733
Market Risk	45,898	56,357
Credit Risk	21,707	22,977
Diversification	(34,505)	(39,625)
Basic Solvency Capital Requirement	121,410	129,442
Operational Risk	36,423	38,832
Loss absorbing capacity of deferred taxes	(19,553)	(17,098)
Total Solvency Capital Requirement	138,280	151,176

C.1 Underwriting Risk

The appetite of BHIIL to underwriting risk aligns with those of Berkshire Hathaway Inc., the ultimate parent company:

"At bottom, a sound insurance operation needs to adhere to four disciplines. It must (1) understand all exposures that might cause a policy to incur losses; (2) conservatively assess the likelihood of any exposure actually causing a loss and the probable cost if it does; (3) set a premium that, on average, will deliver a profit after both prospective loss costs and operating expenses are covered; and (4) be willing to walk away if the appropriate premium can't be obtained."

BHIIL has an appetite to underwrite insurance business on the basis of the first three disciplines, and to withdraw or walk away from business when necessary under the fourth discipline.

BHIIL manages the underwriting cycle and writes selected classes of business over the long-term to achieve an underwriting profit over the course of the cycle. In addition BHIIL provides a service to the market by entering business lines or taking on risks in areas of the market which find themselves constrained by capital or where market inefficiencies exist.

Underwriting risk therefore represents the most significant aspect of risk within BHIIL, but much of this is converted to credit risk through reinsurance placed mainly with NICO, BHIIL's holding company.

Underwriting risk appetite tolerances are set for each line of business as part of the business planning process, or on the writing of a new business line when the decision to enter that line is made (i.e. outside of the annual business planning cycle). Underwriting risk tolerances are proposed by the underwriting committee and approved by the Board, and are monitored at divisional underwriting committees.

Gross aggregate exposure is monitored at the Underwriting Committee. The aggregate exposure is predominantly covered by reinsurance and the reinsurer is advised of exposures over a pre-agreed escalation limit. For internal management and statutory reporting, reserves and planned loss ratios are established at

levels consistent with prudent assumptions with regard to likelihood of loss and probable claims cost. These are monitored and approved at the Finance Committee and the Actuarial Committee.

For solvency and business planning purposes, reserves and planned loss ratios are established at levels consistent with best-estimate assumptions with regard to likelihood of loss and probable claims cost. These are monitored and approved at the Underwriting Committee, Actuarial Committee and the Finance Committee.

Underwriting risk for solvency purposes and relevant to this Solvency and Financial Condition Report primarily arise from:

- planned underwriting not achieving business best estimate plan loss ratios for attritional claims;
- higher than expected large loss or catastrophe (atypical) claim experience; and
- reserve deterioration against best-estimate reserves.

For Regulatory and Solvency purposes BHIIL adopts the Standard Formula approach to estimate the capital requirement to meet the one in two-hundred adverse outcome over a one-year time frame. A stochastic business model estimates the capital requirement to meet the one in two-hundred adverse outcome to ultimate. These assessments include prospective underwriting over the forthcoming year. The Standard Formula uses market wide volatility assumptions to assess risk capital requirements; the stochastic business model uses volatility assumptions as approved by the Finance Committee. The expert judgement in the stochastic business model is monitored and approved at the Finance Committee, and sensitivity testing forms an important part of the Own Risk & Solvency Assessment.

The different reserve assessments for internal management, statutory, and regulatory reporting are reconciled through internal reports considered at the appropriate committee.

The Standard Formula regulatory capital requirement is used for the BHIIL's Own Risk & Solvency Assessment. The Chief Actuary conducts a Standard Formula Appropriateness Assessment, to determine that an internal assessment of capital requirements, "to ultimate" basis, is within an acceptable range compared to the standard formula SCR, which is modelled on an "over 1-year" basis. BHIIL maintains significant surplus above the regulatory capital requirement, which allows it to take up further business opportunities as they arise.

C.2 Market Risk

Market risk refers to the risk of losses on the Investment Portfolio, arising from fluctuations in the market value of the underlying investments.

The investment strategy of the Insurance Portfolio is conservative and investment guidelines require funds to be invested in fixed interest securities rated by Standard & Poor's (S&P) as "A" and above held to maturity. This conservative strategy is designed to protect capital so that it is available to support the underwriting. The Company has no off-balance sheet transactions and has a policy of not investing in derivative contracts.

The Capital Surplus Portfolio is invested in US equities. These are subject to concentration risk and equity price risk.

The investment risk profile is the responsibility of the Finance Committee and is managed in line with the agreed Investment Risk Appetite.

C.3 Credit Risk

Credit risk arises from the possibility of default by one or more counterparties, which include reinsurers and deposit-takers.

The credit risk to reinsurers is predominantly the exposure to NICO and this is assessed within the stochastic business model. The Board is responsible for approving the reinsurance and the Risk Committee is responsible for monitoring the associated credit risk. The Trust Fund Agreements in place with NICO manages the concentrated credit risk.

Credit risk from deposit-takers materially consists of bank exposures. The Finance Committee is responsible for monitoring the credit risk based on the value deposited and the bank credit rating. When determining the level of bank balances the Finance Committee also consider liquidity requirements.

Credit risk on overdue balances is materially premium credit risk which arises from exposure to overdue premium balances. These are often held at, or to be collected by, brokers. The Operations Committee is responsible for monitoring overdue amounts.

C.4 Liquidity Risk

Liquidity risk is the risk that BHIIL will be unable to meet its liabilities as they fall due. This is largely mitigated by the investment guideline requirements which ensure compliance with the risk appetite statement. BHIIL retains significant liquid balances, the investment portfolio is such that it may be converted to liquid assets at short notice, and BHIIL also has the ability to make cash calls on its reinsurer.

The total amount of expected profit included in future premiums within the technical provisions was \$14.0m as at 31 December 2023 (31 December 2022: \$12.6m).

C.5 Operational Risk

Operational risk covers the risks arising from the failure of internal processes, people or systems, or from external events. Operational risk categories are identified as:

•	People	The risk of loss through theft or other fraudulent activity by staff
•	Underwriting internal	The risk of loss through writing unauthorised business
•	Delegated authority	The risk of loss through delegated authority business outside risk appetite
•	Underwriting general	The risk of loss through underwriting losses that are not covered by reinsurance (e.g. due to sanctions issues)
•	Other non-underwriting processes	The risk of loss due to unanticipated excess expenditure
•	Process risk, outsourcing	The risk of loss through outsource providers operational failures
•	Process risk, physical event	The risk of unanticipated physical events impacting the Company's ability to trade
•	Systems	The risk that systems performance issues will lead to operational difficulties
•	Legal & Compliance Risk	The risk of loss due to regulatory or legal action and/or fine Conduct Risk and Financial Crime Risk are treated as two important sub-risks in Legal and Compliance Risk
•	Reputational Risk	The risk of reputational damage
•	Project Risk	The risk of projects not achieving desired outcomes
•	Group Risk	The risk of loss due to Group relationship

The BHIIL senior management team provide an update on operational risks to the Board on a quarterly basis. The Chief Risk Officer ("CRO") monitors the Company's operational risks as part of the quarterly reporting cycle into the Risk Committee, which includes risk appetite monitoring and risk and control assessments.

C.6 Strategic and Other Material Risks

Strategic risk is defined as the risk of lower than expected profits, or impact to the Company's long-term positioning and performance due to inadequate strategy. Strategic risk and the underlying risk components are assessed in the risk and control assessment process. Optimistic and pessimistic business plan sensitivities, which quantify the impact of writing more and less premium than the base business plan, are quantified in the ORSA report.

Climate change related scenarios have been considered capturing the impact of physical and transition risks on BHIIL, which includes assessing the impact of a severe natural catastrophe.

The Board have also assessed that there is no material impact on the valuation of the Company's assets and liabilities.

The Company continues to ensure it has adequate resources to service existing and future projected business and to maintain adequate regulatory surplus capital.

D. Valuation for Solvency Purposes

The details of the Company's Assets and Liabilities as at 31 December 2023 and 31 December 2022 are disclosed in the tables below along with the valuation adjustments between UK GAAP and the Solvency II valuations.

Consistent with Article 75 of Directive 2009/138/EC assets have been valued at the amounts for which the Company expects the assets could be exchanged between knowledgeable willing parties in an arm's length transaction.

Solvency II Balance Sheet as at 31 December 2023, \$000	UK GAAP	Reclassification Adjustments	Solvency II Adjustments	Solvency II
Assets				
Total Investments	901,094	386	-	901,480
Property, plant & equipment held for own use	-	-	702	702
Reinsurance recoverables from Non-Life	2,058,596	(150,614)	(447,586)	1,460,396
Insurance and intermediaries receivables	205,042	(119,347)	-	85,695
Reinsurance receivables	24,377	(10,545)	-	13,832
Receivables -not insurance	13,046	-	-	13,046
Cash and cash equivalents	63,527	1,241	-	64,768
Any other assets	2,066	(1,627)	-	439
Deferred Acquisition Costs	10,698	(10,698)	-	-
Total Assets	3,278,446	(291,204)	(446,884)	2,540,358
Liabilities				
Total Non-Life Technical Provisions -	(2,483,464)	178,927	524,687	(1,779,850)
Gross Technical Provisions	(2,483,464)	178,927	548,136	(1,756,401)
Risk Margin	-	-	(23,449)	(23,449)
Provisions other than technical provisions	(6,644)	-	-	(6,664)
Insurance and intermediaries payables	(16,097)	12,558	-	(3,539)
Deferred tax liabilities	-	-	(19,553)	(19,553)
Reinsurance payables	(150,109)	99,719	-	(50,390)
Payables - not insurance	(25,884)	-	(702)	(26,586)
Total Liabilities	(2,682,198)	291,204	504,432	(1,886,562)
Excess of Assets over Liabilities	596,248	-	57,548	653,796

Solvency II Balance Sheet as at 31 December 2022, \$000	UK GAAP	Reclassification Adjustments	Solvency II Adjustments	Solvency II
Assets				
Total Investments	800,376	(146)	-	800,230
Property, plant & equipment held for own use	-	-	900	900
Reinsurance recoverables from Non-Life	2,049,826	(159,520)	(493,184)	1,397,122
Insurance and intermediaries receivables	184,036	(135,173)	-	48,863
Reinsurance receivables	40,449	(11,028)	-	29,421
Receivables -not insurance	13,579	-	-	13,579
Cash and cash equivalents	84,871	2,581	-	87,452
Any other assets	3,113	(2,435)	-	678
Deferred Acquisition Costs	9,808	(9,808)	-	-
Total Assets	3,186,058	(315,530)	(492,283)	2,378,245
Liabilities				
Total Non-Life Technical Provisions -	(2,455,623)	189,585	562,526	(1,703,512)
Gross Technical Provisions	(2,455,623)	189,585	593,048	(1,672,990)
Risk Margin	-	-	(30,522)	(30,522)
Provisions other than technical provisions	(8,734)	-	-	(8,734)
Insurance and intermediaries payables	(19,972)	13,100	-	(6,872)
Deferred tax liabilities	-	1	(17,098)	(17,098)
Reinsurance payables	(144,421)	112,845	-	(31,576)
Payables - not insurance	(15,627)	-	(900)	(16,528)
Total Liabilities	(2,644,377)	315,530	544,527	(1,784,319)
Excess of Assets over Liabilities	541,682	-	52,244	593,926

D.1 Assets

Assets are valued for Solvency II purposes using the policies detailed below:

Investments

Equities – Equities are valued at the quoted market price as at the balance sheet date.

Bonds - Government, Quasi Government and Commercial bonds are valued at the quoted market price plus the value of accrued interest due as at the balance sheet date.

Money Market Funds – Money Market Funds are valued at the quoted market price as at the balance sheet date.

Deposits other than cash equivalents – Deposits are valued at the value of the deposit as at the balance sheet date.

Reinsurance Recoverables

The reinsurance recoverables, as included in the technical provisions, are calculated using a variety of techniques including a stochastic cash-flow model. While the gross cash-flows are uncertain, the reinsurance cash-flows given the gross cash-flows are certain (before consideration of reinsurer default or disputes) as the terms of the reinsurance program are known.

Due to the importance of the reinsurance program to BHIL, and the fact that the reinsurance program is not particularly complicated (i.e. does not consist of hundreds of facultative covers or different reinsurance strategies over time) BHIL models the actual reinsurance program for the vast majority of the book.

In general the reinsurance program consists of: a quota share cover; followed by a per event excess of loss cover; followed by whole account stop loss cover. For a small proportion of the total gross reserves there is additional reinsurance in place.

A stochastic model allows the expected values of the contingent covers to be more accurately calculated (i.e. the excess of loss and stop loss covers). In order to accurately model the excess of loss cover atypical losses are modelled individually; attritional losses are modelled in aggregate.

The key steps in calculating the reinsurance recoverables are summarised below:

- Simulate the gross claims by segment (the segmentation of the business is described in the "Technical Provisions" section of this document)
- Calculate the reinsurance recoverables by applying the reinsurance program applicable to each segment
- Simulate reinsurer default including the mitigating effects of the trust funds and reinsurer recovery rate
- Discount the reinsurance recoverables based on the expected payment pattern and currency of the cash-flows
- Calculate the average reinsurance recoverables across all simulations
- Finally, allocate reinsurance recoverables to Solvency II class of business and geographical location

Insurance & Intermediaries Receivables

Insurance and intermediaries receivables are valued at the fair value of the amount outstanding reduced by the bad debt provision where applicable. Due to the short-term nature of these amounts discounting is not considered to be material.

Cash & Cash Equivalents

Cash and cash equivalents are valued at fair value as at the balance sheet date.

Differences between Solvency II Valuation and UK GAAP valuation

The material differences between the Solvency II valuation and the UK GAAP valuation as detailed in the table in Section D "Valuation for Solvency Purposes" are as a result of the following:

Investments – Investments valued on a Solvency II basis include accrued interest income which is included in other debtors on a UK GAAP basis.

Property Leases – Leases on premises are valued in accordance with IFRS rather than UK GAAP.

Reinsurance Recoverables – Solvency II values calculated by applying the reinsurance program to the best-estimate gross claims on a stochastic basis; as opposed to being applied to the booked (i.e. prudent) gross claims reported in the statutory accounts on a deterministic basis. The Solvency II values are also discounted; the statutory values are not.

Insurance and Intermediaries Receivables – Receivables exclude the value of inwards pipeline premiums as these are included within the valuation of the technical provisions for solvency purposes.

Reinsurance receivables - Reinsurance receivables exclude the value of outwards pipeline commissions due as these are included within the valuation of the technical provisions for solvency purposes.

Deferred Acquisition Costs – Deferred Acquisition Costs are not included in the Solvency II valuation in accordance with the valuation guidelines.

D.2 Technical Provisions

The technical provisions are the discounted present value of future insurance cash-flows, valued on a best-estimate basis, for business bound as at the valuation date, plus a risk margin. Gross and reinsurance cash-flows are modelled explicitly.

The best-estimate cash-flows and their underlying assumptions, are reviewed and approved on a quarterly basis at the Underwriting Committee, with further review undertaken at the quarterly Finance Committee.

For modelling purposes the business is segmented by:

- Branch BHIIL operates in the UK, and has branches in Italy, Switzerland and Germany.
- Division BHIIL groups business according to Berkshire Hathaway internal reporting divisions including: Berkshire Hathaway Reinsurance Group, Berkshire Hathaway Specialty Insurance, MedPro, and Faraday MGA Ltd.
- Distribution Channel BHIL writes business through numerous distribution channels; these distribution channels can vary according to each Division. They can broadly cover: underwriting teams (for business written directly), brokers (for facility business) and managing general agents.
- Class of Business BHIL writes multiple classes of business. Large speciality accounts are treated as
 distinct classes of business for modelling and reporting purposes.
- Year of account Gross claims are modelled by year of account (i.e. generally the year in which the business incepts) as opposed to accident year (i.e. the year in which the business was earned).
- Loss type There are three loss types modelled: attritional; large and catastrophe. Attritional losses are calculated in aggregate, while the large and catastrophe losses are calculated 'per event'. Large and catastrophe losses are grouped together for reporting purposes as 'atypical' losses.

The methodologies used to calculate the premiums, deductions, expenses and reinsurance cash-flows are the same for all classes of business. The methodologies used to calculate gross claims depend on the distribution channel and class of business, and are based on standard actuarial techniques such as chain-ladder, Bornhuetter-Ferguson and target loss ratio.

Premiums, and associated deductions (e.g. commission and brokerage), are calculated at policy level. Once a premium 'due date' passes it is removed from the technical provisions and moved to the 'payables' section of the balance sheet.

Expenses are assessed, at a minimum, at the Distribution Channel level and are estimated by the Finance team.

All cash-flows are calculated gross of discounting; the discounted present values are then calculated using the relevant payment pattern and currency yield curve.

Risk margin is calculated using the "cost of capital" approach – the cost of holding capital to support the technical provisions until their ultimate run-off.

The technical provisions are an output from a variety of sources including the stochastic business model; the figures reported in the QRTs are the mean of the distributions.

Differences between Solvency II Valuation and UK GAAP valuation

The material differences between the Solvency II valuation and the UK GAAP valuation as detailed in the table in Section D "Valuation for Solvency Purposes" are as a result of the following:

Technical Provisions – the liabilities for the statutory accounts are calculated using prudent methodologies and assumptions while the liabilities for the Solvency II accounts are calculated using technically compliant "best estimate" methodologies and assumptions. The main contributors to the difference in the two liability figures are:

- Pipeline premium is treated as a negative liability in the Solvency II balance sheet (and included in the technical provisions) whereas the pipeline premium is treated as an asset in the Statutory balance sheet.
- Discounting: the Solvency II technical provisions are discounted whereas the statutory technical provisions are not.

D.3 Other Liabilities

Other liabilities are valued for Solvency II purposes using the policies detailed below:

Insurance & intermediaries payables

Insurance & intermediaries payables are valued at the fair value of the amount payable. Due to the short-term nature of these amounts discounting is considered to be inappropriate.

Reinsurance payables

Reinsurance payables are valued at the fair value of the amount payable. Due to the short-term nature of these amounts discounting is considered to be inappropriate.

Payables (trade, not insurance)

Other payables are valued at the fair value of the amount payable. Due to the short term nature of these amounts discounting is considered to be inappropriate.

Deferred tax liability

A deferred tax liability results from the difference in value of the Statutory and Solvency II balance sheets. The deferred tax liability is calculated at the tax rate at which the liability is expected to be paid in the future.

Differences between Solvency II Valuation and UK GAAP valuation

The material differences between the Solvency II valuation and the UK GAAP valuation as detailed in the table in Section D "Valuation for Solvency Purposes" are as a result of the following:

Insurance Payables - Insurance payables exclude the value of inwards pipeline commissions due as these are included within the valuation of the technical provisions for solvency purposes.

Deferred taxation — The deferred tax liability arises due to the difference in valuation of the Statutory and Solvency II balance sheets.

Reinsurance Payables - Reinsurance payables exclude the value of outwards pipeline premiums due as these are included within the valuation of the technical provisions for solvency purposes.

D.4 Alternative methods for valuation

BHIIL does not use any alternative valuation methods.

E. Capital Management

E.1 Own Funds

The Company has put in place a Capital Management policy to ensure that 'Own Fund' items, both at issue and subsequently, meet the requirements of the Solvency II capital regime. The objectives of the policy are to ensure the Company has sufficient capital to meet its financial obligations, even under adverse conditions. More specifically, to outline the Company's risk appetite with regards to capital, to ensure there are clear lines of responsibility in respect of the Company's capital management, to ensure there are adequate models, systems, and processes in place to estimate and monitor capital requirements, and to ensure there are clearly defined triggers and subsequent actions at different levels of capital.

On a quarterly basis own funds are reviewed to ensure they continue to meet the Company's own solvency needs, and its regulatory obligations in respect of Solvency Capital Requirement and Minimum Capital Requirement. A three-year forward-looking time horizon is used for business planning purposes and any anticipated changes to the Company's business and risk profile are factored into the ORSA process to assess the solvency and capital needs over this business planning period.

Own Funds are the measurement of the available financial resources the Company has available to meet its regulatory SCR and MCR. All Own Funds are Tier 1 funds and consist of ordinary share capital and retained earnings. All of these Tier 1 Funds are classed as unrestricted and of a high quality.

Details of the Company's Own Funds as at 31 December 2023 and 31 December 2022 are disclosed in the tables below.

The Solvency II Net Assets along with the UK GAAP equivalent is also presented.

Solvency II Own Funds and Net Assets with UK GAAP Equivalents

Year ended 31 Dec 2023	Solvency II value \$000	GAAP value \$000
Tier 1 Funds		
Called up share capital	432,998	432,998
Retained earnings		163,250
Reconciliation reserve	220,798	
Total Basic Own Funds	653,796	596,248

Year ended 31 Dec 2022	Solvency II value \$000	GAAP value \$000
Tier 1 Funds		
Called up share capital	432,998	432,998
Retained earnings	-	108,684
Reconciliation reserve	160,928	-
Total Basic Own Funds	593,926	541,682

The reconciliation reserve represents the difference between the Solvency II valuation of the balance sheet and the statutory valuation under current UK GAAP.

The Company does not have any ancillary own funds.

E.2 Solvency Capital Requirement and Minimum Capital Requirement

BHIIL uses the Standard Formula as the basis for calculating capital requirements having reviewed the assumptions underlying the formula and assessed them as appropriate.

The Company's Solvency Capital Requirement at 31 December 2023 is \$138.3m (2022: \$151.2m) and the Company's Minimum Capital at 31 December 2023 is \$39.1m (2022: \$37.8m).

Solvency Capital Requirement

	2023 \$000	2022 \$000	Change \$000
Market risk	45,898	56,357	(10,459)
Counterparty default risk	21,707	22,977	(1,270)
Health underwriting risk	417	1,267	(850)
Non-life underwriting risk	87,893	88,466	(573)
Operational risk	36,423	38,832	(2,409)
Diversification credit	(34,505)	(39,625)	5,120
Loss absorbing capacity of deferred taxes	(19,553)	(17,098)	(2,455)
Solvency Capital Requirement	138,280	151,176	(12,896)

Minimum Capital Requirement

	2023 \$000	2022 \$000	Change \$000
Linear MCR	39,076	37,073	2,003
MCR Cap (45% of SCR)	62,226	68,029	(5,803)
MCR floor (25% of SCR)	34,570	37,794	(3,224)
Absolute floor of the MCR	4,084	3,961	123
Minimum Capital Requirement	39,076	37,794	1,282

Year on year the Solvency Capital Requirement has decreased by \$12.9m or 9%. This was largely as a result of the decrease in market risk (\$10.5m) driven by a significant drop in the value of equities in the year. The SCR also decreased by (\$2.5m) as a result of the increase in loss absorbing capacity of deferred tax during the year. This was offset partially by a decrease in diversification credit (\$5.1m). The Minimum Capital requirement has increased slightly in the reporting period.

E.3 Use of the duration-based equity risk sub-module in the calculation of the Solvency Capital Requirement

BHIIL has not opted to use the duration-based equity risk sub-module of the Solvency Capital Requirement.

E.4 Differences between the standard formula and internal model used

BHIIL applies the standard formula model and does not use an internal model to calculate the Solvency Capital Requirement.

E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement

There was no breach of the Solvency Capital Requirement (and hence the Minimum Capital Requirement) over the reporting period.

By reference to the Solvency Capital Requirement and the Minimum Capital Requirement, the Solvency II own funds substantially exceed the capital requirements. By these measures, BHIIL remains in a satisfactory capital position.

Appendix 1

Directors' Statements in respect of the SFCR

Berkshire Hathaway International Insurance Limited

Approval by the Board of Directors of the Solvency and Financial Condition Report

Financial period ended 31 December 2023

We certify that:

the Solvency and Financial Condition Report ("SFCR") has been properly prepared in all material respects in accordance with the PRA rules and Solvency II Regulations; and

we are satisfied that:

- (a) throughout the financial year in question, the insurer has complied in all material respects with the requirements of the PRA rules and Solvency II Regulations as applicable at the level of the insurer; and
- (b) it is reasonable to believe that, at the date of the publication of the SFCR, the insurer has continued so to comply, and will continue so to comply in future.

Appendix 2

Independent Auditors Report

REPORT OF THE EXTERNAL INDEPENDENT AUDITOR TO THE DIRECTORS OF BERKSHIRE HATHAWAY INTERNATIONAL INSURANCE LIMITED ('THE COMPANY') PURSUANT TO RULE 4.1 (2) OF THE EXTERNAL AUDIT CHAPTER OF THE PRA RULEBOOK APPLICABLE TO SOLVENCY II FIRMS

Report on the Audit of the relevant elements of the Solvency and Financial Condition Report ("SFCR")

Opinion

Except as stated below, we have audited the following documents prepared by the Company as at 31 December 2023:

the 'Valuation for solvency purposes' and 'Capital Management' sections of the SFCR of the Company as at 31 December 2023, ('the Narrative Disclosures subject to audit'); and

Company templates S.02.01.02, S.17.01.02, S.23.01.01, S.25.01.21, S.28.01.01, ('the Templates subject to audit').

The Narrative Disclosures subject to audit and the Templates subject to audit are collectively referred to as the 'relevant elements of the SFCR'.

We are not required to audit, nor have we audited, and as a consequence do not express an opinion on the Other Information which comprises:

the 'Executive summary', 'Business and performance', 'System of governance' and 'Risk profile' elements of the SFCR;

Company templates S.05.01.02, S.05.02.01, S.19.01.21;

the written acknowledgement by management of their responsibilities, including for the preparation of the SFCR ('the Responsibility Statement').

In our opinion, the information subject to audit in the relevant elements of the SFCR of the Company as at 31 December 2023 is prepared, in all material respects, in accordance with the financial reporting provisions of the PRA Rules and Solvency II regulations on which they are based, as modified by relevant supervisory modifications, and as supplemented by supervisory approvals and determinations.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK), including ISA (UK) 800 and ISA (UK) 805. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the relevant elements of the Solvency and Financial Condition Report* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the SFCR in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter – Basis of Accounting

We draw attention to the 'Valuation for solvency purposes' and 'Capital Management' sections of the SFCR, which describe the basis of accounting. The SFCR is prepared in compliance with the financial reporting provisions of the PRA Rules and Solvency II regulations, and therefore in accordance with a special purpose financial reporting framework. The SFCR is required to be published, and intended users include but are not limited to the PRA. As a result, the SFCR may not be suitable for another purpose. Our opinion is not modified in respect of these matters.

Conclusions relating to going concern

In auditing the SFCR, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the SFCR is appropriate.

Our evaluation of the directors' assessment of the company's ability to continue to adopt the going concern basis of accounting included:

- evaluating management's stress and scenario testing and challenging management's key
 assumptions. With involvement of internal actuarial specialists, we assessed the governance
 over, and the production of, solvency monitoring information, and considered its consistency
 with other available information and our understanding of the business;
- evaluating management's assessment of the risks across the company through specific reference to the Own Risk and Solvency ("ORSA"), including solvency risk, liquidity risk, and operational matters;
- assessing the company's performance, capital position and the impact of climate change, inflationary environment, and economic uncertainty on the company's operations and balances; and
- assessing the going concern disclosures made by management in the financial statements. Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from when the SFCR is authorised for issue.

Other Information

The Directors are responsible for the Other Information.

Our opinion on the relevant elements of the SFCR does not cover the Other Information and, we do not express an audit opinion or any form of assurance conclusion thereon.

Our responsibility is to read the Other Information and, in doing so, consider whether the Other Information is materially inconsistent with the relevant elements of the SFCR, or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the relevant elements of the SFCR themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this Other Information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of Directors for the Solvency and Financial Condition Report

The Directors are responsible for the preparation of the SFCR in accordance with the financial reporting provisions of the PRA rules and Solvency II regulations.

The Directors are also responsible for such internal control as they determine is necessary to enable the preparation of a SFCR that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the relevant elements of the Solvency and Financial Condition Report

It is our responsibility to form an independent opinion as to whether the relevant elements of the SFCR are prepared, in all material respects, with financial reporting provisions of the PRA Rules and Solvency II regulations on which they are based.

Our objectives are to obtain reasonable assurance about whether the relevant elements of the SFCR are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the decision making or the judgement of the users taken on the basis of the SFCR.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: https://www.frc.org.uk/auditorsresponsibilities. The same responsibilities apply to the audit of the SFCR.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

We considered the nature of the company's industry and its control environment, and reviewed the company's documentation of their policies and procedures relating to fraud and compliance with laws and regulations. We also enquired of management about their own identification and assessment of the risks of irregularities.

We obtained an understanding of the legal and regulatory frameworks that the company operates in, and identified the key laws and regulations that:

- had a direct effect on the determination of material amounts and disclosures in the SFCR. These
 included Solvency II as implemented in the UK, Prudential Regulation Authority ("PRA") regulation
 and HRMC legislation; and
- do not have a direct effect on the SFCR but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty. These included Companies Act 2006 and related Company Law.

We discussed among the audit engagement team including relevant internal specialists such as actuarial, IT specialists regarding the opportunities and incentives that may exist within the organisation for fraud and how and where fraud might occur in the financial statements.

In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override. In addressing the risk of fraud through management override of controls, testing the appropriateness of journal entries and other adjustments; assessing whether the judgements made in making accounting estimates are indicative of a potential bias; and

evaluating the business rationale of any significant transactions that are unusual or outside the normal course of business.

In addition to the above, our procedures to respond to the risks identified included the following:

- reviewing the SFCR disclosures by testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- enquiring of management, the Audit Committee and in-house legal counsel concerning actual and potential litigation and claims, and instances of non-compliance with laws and regulations; and
- reading minutes of meetings of those charged with governance, reviewing correspondence with the PRA and FCA reviewing internal audit reports.

Report on Other Legal and Regulatory Requirements

In accordance with Rule 4.1 (3) of the External Audit Chapter of the PRA Rulebook for Solvency II firms we are required to consider whether the Other Information is materially inconsistent with our knowledge obtained in the audit of Berkshire Hathaway International Insurance Limited's statutory financial statements. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in relation to this matter.

Use of our Report

This report is made solely to the Directors of Berkshire Hathaway International Insurance Limited in accordance with Rule 4.1 (2) of the External Audit Chapter of the PRA Rulebook for Solvency II firms. We acknowledge that our report will be provided to the PRA for the use of the PRA solely for the purposes set down by statute and the PRA's rules. Our audit work has been undertaken so that we might state to the insurer's Directors those matters we are required to state to them in an auditor's report on the relevant elements of the SFCR and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the PRA, for our audit work, for this report or for the opinions we have formed.
